The Men Who Are Today Lifting The World Upward And Onward Are Those Who Encourage More Than Criticise.

IUKA, TISHOMINGO COUNTY, MISSISSIPPI

THURSDAY, MARCH 18, 1943

NUMBER 32

"The Parson Ponders"

Lloyd L. King

the people of these United States, confronted, dismayed, confused by the welter of regulations, often uninterpreted and that department re- gulations, declared to be law and the prophets to- morrow, would the body-politic crazy were not possible to apply some common sense in looking to the

There is no single phase of American way of life not affected by this confusion. In- dustry, distribution, factory and home, the school, churches. Our country is faced with a big job, and the it is that we have not comfort and light of past to guide us. We simply feel our way out of darkness and confusion. A war, lost in the forest, had beware of panic.

Parson Ponders, remembering military experience in the war, knows that in the phase of a great battle there is confusion and disor- der. Over the lines of com- munication comes order upon order, often contradictory, more than often touched in confusion hard to be understood. Troops often had a sneak- vision of confusion at quarters. But the troops do not retreat or retreat. They are carried on. Suddenly there is a short pause in the battle, and some clear understandable orders, issued by those who were sure of what must be done and how to best do it. Our cheering, went forward

Let our American people keep heads. One of these days a period of initial confusion have passed because the lack of experimentation have led. From Washington will come the clear and understand- ing orders, issued by our lead- ers, sure of themselves, sure of the objectives, sure of the best to attain these objec- tives. Cheering them, this nation shall move for- ward to victory; conscious of strength in properly co- ordinated effort.

After the victory, then what? A foolish optimist could expect a lack of confusion. A world will find itself faced with new problems of adjust- ment which will really try its International relation- ships will multiply until our confusion of the present will be by comparison a Sunday picnic! The cause will be the same as now; uncharted waters with no past experiences

are to say that out of the confusion, born of an- international hatreds, mis- understandings, will come some understandings of what I have said to you one of these when the disorder is over. I believe that God will have men in every nation; they will let there be light!" and light will come.

How could the country grocer that the little fellow who in his store, clutching two in a dirty hand, trying to solve the problem of what candy would grow from an ob- ject mountain boy to Cordell Secretary of State? How the humble school teacher that she is imparting and learning to a lad to speak the clear which will call a mad to back to order and sanity?

Parson Ponders knows future leaders of mankind

TO THE VOTERS OF TISHOMINGO COUNTY

I take this method of announc- ing my candidacy for re-election to the office of Tax Assessor.

Fist, I want to thank each of you for your support in the past election and for your coopera- tion in carrying out the duties of the office. It has indeed been a pleasure to me to serve my county in this capacity. I have put forth every effort to carry out the work of the office effectively and efficiently, have had the interest of the tax payer at heart, and have devoted my time to that interest. I promise to do the same for another term if given the chance.

I shall try to see each of you personally before the August primaries, but in case transpor- tation difficulties should not permit me doing so, please consid- er me before you cast your vote. I assure you that if elected I shall do all in my power to prove myself worthy of the confidence you place in me.

Respectfully yours,
EDGAR A. PACE

SOUTHERN TIRE CO. OPEN FOR BUSINESS

New Building On South Court Street Completed; Machinery Installed

Southern Tire Company, op- erators of a tire recapping plant in Sheffield and recent purchasers of the building at 312 S. Court Street, have com- pleted their construction and installation program and are now open for business, J. W. Gaskins, owner-manager, an- nounces.

Mr. Gaskins stated that one of the finest plants in the state is now available here for re- capping and vulcanizing of tires. The new building, just com- pleted, provides an ideal work- ing airy and light, making it possible to do highest quality work. The equipment installed is the most modern that is possible to purchase and the large force employed is ex- perience and capable. An ad- equate supply of the best re- capping rubber obtainable is on hand and Mr. Gaskins reports that full cooperation of the tire rationing board is assured.

In discussing the recapping business, Mr. Gaskins pointed out that it is not necessary to have a certificate now to have a passenger car tire recapped and added that he was in position to recap all sizes tires as well as being able to vulcanize tractor tires.

Although in position to turn out many recapping jobs each day in his Florence plant, Mr. Gaskins stated that his two plants were ready to go on 24-hour service each if the demand for recapping required it.

IUKA, ROUTE 2

Mrs. Lillian Barnes Machens of Amboy, Ill., has been a recent visitor to relatives here.

Mrs. John Grisham of Ruth- erford, Tenn., and Mrs. John Blackard of Blytheville, Ark., have been visiting their mother, Mrs. Etta Grisham.

Mrs. Edd Parnell and Mrs. Finch Davis spent a few days with relatives in Nashville, Tenn., recently.

Sorry to report the illness of Mrs. Bert Jones and Mrs. Fannie Counts.

Mr. Ed Parnell went to Mem- phis last Friday. While there he enjoyed a few hours visit with an old friend, Mr. Lewis Jourdan.

Mr. Arl White and family, of Cross Roads, spent Sunday with Mr. and Mrs. Jack Grisham.

Several people from this sec- tion went to Iuka last week to hear "Parson Ponders."

are somewhere in waiting and preparation. And Parson Pon- ders will continue to bring them to the House of God wherever he preaches. If our churches are wise, we shall nourish and fellowship and encourage there youngsters.

TISHOMINGO COUNTY AGAIN TOPS QUOTA

BOND SALES 129%

North Mississippi Goes Over Top 2 1/2 %

Tishomingo County again goes over the top on Bond buy- ing of "E" Bonds for the month of February.

Again we are glad to list sales as reported by town of the county.

Belmont	\$2,431.25
Burnsville	918.75
Golden	18.75
Iuka	14,456.25
Tishomingo	1,950.00
Leedy	93.75
Paden	18.75

Systematic and regular pur- chase of Bonds will make it possible for our county to meet its monthly quota.

Some sales cannot be identi- fied by towns, this accounts for any difference between the to- tal for the above and the total for the county.

VANDIVER PRAISES PART OF SCHOOL CHILDREN IN WAR EFFORT

Commencement exercises will be held in a number of our schools during the month of March, thus indicating the close of the first full school session since the United States has been drawn into war. Many of our schools have foreseen com- munity needs and have ad- justed their school program in order that they could complete a full year of school work and at the same time release the school children to help on the farm and in the community.

We commend our school forces for their vision and foresight; we commend our school children for their enthusiastic response in joining the F.F.A., 4-H Club, High School Victory Corps, and other organizations that aid in the war effort and that will car- ry on through the school vaca- tion.

In the total war effort, our school forces play a potent part. We must not overlook an oppor- tunity to serve the needs of the local community. Production must be increased, and we feel confident that the school chil- dren of Mississippi will join in this effort enthusiastically.

MR. M. H. CLAUNCH VISITS SON Spends Several Days At Camp In Oklahoma

Reporting the trip as one of the most enjoyable of his life, Mr. M. H. Claunch has just re- turned from a visit to his son, Pvt. Weldon Claunch, who is in camp at Moskogue, Okla. Mr. Claunch was accompanied by his daughter, Mrs. Hester Hobbs of Russellville, Ala., and her young daughter, Bobby Jean. One of the pleasantest features of the trip, was stay- ing in one of the large guest houses at the camp, where Mr. Claunch reports comfort was at its best. Food in the Guest Hall was fine, and Mr. Claunch was deeply impressed with the discipline of the soldiers, both on and off duty.

Mr. and Mrs. Claunch have three sons in the service, one at Camp Shelby and another in North Africa, whom they hear from as often as the boys in the States.

BURNSVILLE SCHOOL ENTERTAINMENT, TUESDAY, MARCH 23

Box Supper, Cake Walk and Bingo

Tuesday night, March 23rd there will be an entertainment of varied nature at the Burns- ville School House

There will be a Box Supper, Cake Walk, Bingo and School candidate speaking.

This promises fun and enter- tainment for all, according to Horace M. Marlar, manager adv committee.

TO THE VOTERS OF THE SECOND DISTRICT

I hereby make my announce- ment for Supervisor of the Sec- ond District of Tishomingo County, subject to the Demo- cratic primary in August. In announcing for this important position I can say I have studied the problems of the farmers, schools, roads and taxes. If elected will do my best to handle these matters to the best in- terest of the people, and give each problem coming before me honest and efficient service. To those who have urged me to run and to those who have offered me their support without solicitation because they consid- er me worthy of this trust, I express my appreciation and to assure all others that my time will be given without res- triction to whatever matters may come to my attention.

Yours for service,
KINNIE LAMBERT

NEWS OF SOLDIERS

Pvt. Clovis Leon Blunt, and Pvt. Bernar A. Patterson, were classmates in Tishomingo High School, and entered the Army together. They are now in Co. A the "Mighty 55th" arm'd Engineer of the 10th arm'd Di- vision at Fort Benning, Georgia, where they have finished their basic training and are now ready for their tough Tiger training. They both report that they expect to make the grade!

Pvt. Jesse Biggs of Ft. Riley, Kansas, is on furlough, visiting his parents, Mr. and Mrs. Charlie Biggs.

It is now Corporal Henry M. (Marcus) Parnell. This young man received his promotion March 1st. He is stationed at Nashville, Tenn. Cpl. Parnell is receiving congratulations from his friends over this evi- dence of his success as a soldier.

Pvt. James O. Clingan, one of the most "travelled" of our boys, is now at McClellan Field California, where he is in the Casual Det. He is the son of Mr. and Mrs. A. W. Clingan.

Pvt. Charles L. Pace, who re- cently volunteered in the U. S. Army, is stationed at Camp Robinson, Ark. He is the son of Cecil Pace, but for a number of years has made his home with his grandfather, C. L. Pace.

By the time news had gotten around that he had "joined up" one of the nicest letters you ever read came in from our own "Billie" Pace, now William Merle to the Navy, who is sta- tioned at the Naval Training Station at Bainbridge, Md. Billie wants the "home town paper" and said many nice things. He writes a good letter and shows every indication of being determined to make good in Uncle Sam's Navy.

Pvt. Roy Waddy, stationed at West Chester, Penna., writes the editor a long and keenly in- teresting letter, giving a splen- did picture of his life in service. His report of an emergency duty on K. P. (cook is the sam- thing) is amusing, and surpris- ing too! He has gained about ten pounds, and is still going. If you think that the day of a soldier who is really trying to get ahead is a snap, you should read "Cotton's" "my day."

Pvt. Charlie H. Biggs, who is in North Africa, writes that he received his first copy of The Vidette, and really enjoyed it. He is the son of Mr. and Mrs. C. C. Biggs of Route 2.

Sgt. Chester Curtis, who has been stationed at Camp For- rest, Tenn. has been at home on furlough visiting his pa- rents, Mr. and Mrs. M. L. Cur- tis of Cross Roads. Sgt. Curtis is being transferred to Grin-

THE HOME FRONT

It became clear this week that granting deferment to farm workers and bringing some men who have left back from the Army will be only a partial so- lution to the problem of farm labor shortages. Volunteers of the U. S. Corps—high school youths, women and others— must help this year.

The farmer himself will nec- essarily be the master crafts- man who will instruct these amateurs in agriculture. It won't be easy, but it's been done successfully in England, and it can be done here.

Few Trucks

Only 57,000 new commercial vehicles remain in the nation's "reserve pool"—Before the war we were making 700,000 a year.

"A" book coupon No. 4 for gasoline expires next Sunday. The same goes for coffee stamp No. 25.

Folks who lose their ration books can apply for replace- ments at the local ration board, but if the board finds that it was lost or stolen through neg- ligence it may hold up the is- suance of a new one for 60 days.

OPA No Gestapo

Entering homes in search of violators of OPA regulations won't be countenanced except where inspectors go through the legal procedure of obtain- ing a search warrant.

Owners of roadside tourist camps must now offer their cabins at monthly rates. OPA says some auto court landlords have been charging daily rates to tenants who were forced to live in camps because of crowd- ed housing conditions in boom- ing war towns.

No New Building

Construction material short- ages and lack of labor caused WPB to ban unauthorized new buildings months ago. Some new construction is still going on, however, and wildcat build- ers now are facing trouble. No one should start building with- out seeing the WPB first. \$18,000,000 worth of construc- tion was nipped in the bud by WPB last week.

The report that OPA would forbid hotels to hold luncheons for civic clubs has been denied by OPA.

Paper Savings

The Office of War Information has eliminated more than 40,000,000 publications and unnec- essary press releases of the Federal government.

Pea, bean and lentil seeds for planting are exempt from the food rationing program.

Washlines are long at Army camps here and overseas this year, so housewives and com- mercial laundries will get no more washing machines.

Less Fish

It is now thought likely there will be a shortage of seafoods this year. Many who have fol- lowed the sea as fishers of food are now in the Navy as fishers of Nazis, and there are military restrictions on places where fishing is permitted these days.

One of the best way to save gas and rubber is through car sharing. Giving someone a lift is more than neighborly cour- tesy now, it's a war-time serv- ice.

nelle College, Iowa, for his further service

Pvt. James T. Rickard, who is stationed at Jefferson Bar- racks, in the Air Corps, has been visiting his parents, Mr. and Mrs. J. P. Rickard. Pvt. Rickard left for camp Wednes- day night

Pvt. Travis L. Letson of Camp Foster, Kansas, in the supply battalion, is on a 12-day furlough with his parents, Mr. and Mrs. J. E. Letson of Paden, Route 1.

William E. Walker, son of Mrs. Clara Bullard, of Route 4,

RED CROSS DRIVE NEARS GOAL

As Reports Come In From Committees

With many committees still unreported, due to return calls on residents in their territory, optimism reigns among the workers, that the goal set for Tishomingo County of \$2,700.00 will be reached, if those still to donate to the program will reach down in their pockets, and enable the committees to close their reports, by making their gifts promptly now. Mr. William Pyle, War Fund Drive chairman, states that every group reporting is meeting their quota, or going over the amount and it is hoped that all reports will be in this week, so that full accounting can be made next week, which is the last week in the month of March.

Mr. Candler Oaks, County Superintendent, reports the fol- lowing schools as having met their quota or passed the 100 per cent mark: Barnes Chapel, Cripple Deer, Liberty, Pleasant Hill, Walker, Tishomingo Elementary, and the Iuka white. Among the colored schools, Burnsville, Carter's Branch, Cartersville; (This school went 150% over their quota) and Macedonia. It is of interest to note that a drive has not been made among the schools and the enthusiastic re- sponse of the schools is another evidence that Red Cross is re- ceiving the deserved considera- tion in the homes of every com- munity, when it is such a vital organization with our Armed Forces.

has been promoted to the rank of Staff Sergeant at the base headquarters and Air Base Squadron, at the Neward Air- port. Sgt. Walker enlisted in the Air Corps last October, and is in charge of squadron trans- portation at the Neward Base.

Joseph T. Jones, son of Mrs. B. L. Jones, Route 2, Iuka, has been promoted from technician fifth grade in the U. S. Army to technician fourth grade, it has been announced by the commanding officer of the Har- bor Defences of Key West where Sgt. Jones is stationed with the medical detachment of the service command unit. A graduate of Iuka High School in 1935, Sgt. Jones was assis- tant manager for McCrory Stores Corp., at Rock Hill, S. C. before he entered the Army in May, 1941.

WEEKLY NEWS ANALYSIS

Meat Ceilings to Check Black Market; Bismarck Sea Triumph Forecasts U. S. Drive to Sweep Japs From New Guinea; Small Firms Get Billions for War Work

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)
Released by Western Newspaper Union.

Even the most advanced air base in Tunisia gets its mail, as pictured above. This photo of the mailman arriving and being welcomed at an advanced U. S. air base of Gen. Dwight Eisenhower's army, should be an incentive to those on the home front to write and keep writing to loved ones no matter how far away on Uncle Sam's service they may be.

BLACK MARKET: Action on Meat

Action rather than words was the keystone of a program sponsored by the OPA and the department of agriculture to smash the black markets in meat.

First barrage laid down in this offensive was Price Administrator Prentiss M. Brown's order imposing specific retail price ceilings on meat, beginning with pork products. Second attack came in the announcement by Secretary of Agriculture Wickard of orders licensing livestock slaughterers as well as those who buy and sell livestock for slaughter.

Effective April 1, the meat ceilings were expected to check black markets and end an "unjust squeeze" on packers. Mr. Brown said they would also lay the groundwork for the start of meat rationing about April 15. Pork ceilings were to be followed by uniform regulations on beef and lamb.

When red meat rationing is undertaken, the order will include bacon, butter, cheese, lard and other cooking fats.

With prices uniform throughout a community on all cuts of meat, Brown said, it would be difficult for dealers to get rid of illicit meat at higher prices.

RUSSIANS: Repeat Old History

Back over the snowy Russian steppes where Napoleon's army perished long ago reeled the retreating German legions.

While the collapse of Nazi resistance at Rzhev had been of high immediate strategic importance to the Red command it was prophetic of further Nazi reverses, for with the whole German salient west of Moscow unhinged, the fate of Orel and Vyazma to the east virtually sealed.

The rapidity of the Russian advance was indicated by the capture soon afterward of Olenino 35 miles west of Rzhev giving control of the railway running from Moscow to Velikie Luki.

While German spokesmen described the Rzhev defeat as a strategic withdrawal to shorten Nazi lines, Allied military observers saw in it a threat to all Axis defenses from Smolensk to the Baltic sea.

In the South the Russians had moved forward more slowly, impeded by the first thaws of oncoming spring. But Red forces were reported driving forward from recaptured Lgov, important railroad center west of Kursk.

WAR COST: Exceeds 43 Billion

More than \$43,830,452,651 was spent for war purposes in the first eight months of the current fiscal year, it was disclosed by the treasury department.

The war department spent the most for war—\$27,303,243,684. The navy spent \$11,502,653,956, the maritime commission \$1,685,143,236 and the war shipping administration \$733,211,740.

Expenditures by the government for all purposes during the eight-month period totaled \$47,600,944,727, while net revenue totaled \$9,512,803,497. The government's deficit for the eight months was \$38,084,682,603.

SMALL BUSINESS: Good News Ahead

Good news for small business concerns was forthcoming from Charles E. Wilson, executive vice chairman of the War Production board when he announced that war contracts placed with smaller companies "will run into billions of dollars by the end of the year."

Wilson said that more than \$30,000,000 of work a week is being placed now with small business firms through the efforts of the Smaller War Plants corporation.

The WPB's program for small business, Wilson said, includes: 1—An increase in the number of prime contracts placed with small plants; 2—Widening of WPB's lending policy to make loans to small business easier; 3—Certification of more small plants to handle war contracts.

BISMARCK SEA: Disaster for Japs

Three facts of major significance to the future of the war in the Pacific emerged from the stunning victory of General MacArthur's bombers over the 22-ship Jap armada in the Bismarck sea, approaching New Guinea.

Fact No. 1 was that in sinking the 22 enemy ships and bagging 82 Jap planes, MacArthur's airmen proved that a force of land-based bombers manned by skilled pilots is more than a match for a sea-borne invasion force. Fact No. 2 was that the victory removed the danger of invasion to the Australian mainland for the time being at least. Fact No. 3 was that the enemy garrisons at Lae and Salamaua, New Guinea, would not now be reinforced, for it was estimated that 15,000 Jap troops perished when Yankee bombs sank their transports.

Military observers believed that one of the immediate results of the Jap disaster would be an increase in pressure by General MacArthur's armies besieging Lae and Salamaua with the object of driving the Japs entirely from New Guinea.

The clean-sweep character of the American triumph was summarized in General MacArthur's terse communique: "We have achieved a victory of such completeness as to assume the proportions of a major disaster to the enemy."

The clean-sweep character of the American triumph was summarized in General MacArthur's terse communique: "We have achieved a victory of such completeness as to assume the proportions of a major disaster to the enemy."

NAVY: Predict 10% Losses

A navy "big enough to dominate all seas over the world" was envisioned by Secretary Frank Knox, who added a warning that the American people must be prepared to expect a 10 per cent casualty rate in navy personnel before the war's end.

Secretary Knox and ranking naval officials unfolded a program for building up personnel strength to 2,250,000 by July, 1944, in testimony before the house subcommittee on naval appropriations. Appropriations totaling \$3,816,000,000 to implement this program were approved by the subcommittee.

The navy had 3,205 ships in commission on January 1, 1943, according to Rear Admiral Randall Jacobs, chief of the bureau of personnel. This number will be increased to approximately 4,100 by the end of the year, he added.

Washington Digest

Hitler in Mental Decline? Close Observers Say Yes

Reliable Reports Indicate Fuehrer Subject to Uncontrolled Emotions; German Physician Believes He Will Have Mental 'Explosion.'

By BAUKHAGE
News Analyst and Commentator.

WNU Service, Union Trust Building, Washington, D. C.

Where is Hitler? That question can't be answered with any certainty at this writing and nobody seems to care. For more than a month, the communications from the German High Command have not borne the Fuehrer's signature. The anniversaries of two of the great events in Nazi history have come and gone, the celebrations were held with very little display in comparison with other years and entirely without appearance of the No. 1 Nazi himself. Hitler has made no public appearance for months.

It is true that communications supposedly from the Fuehrer have been made public but always through a second party, notably the speech on the anniversary of the founding of the National Socialist party. The set excuse is that Hitler is with his troops in the Russian front. But at the rate that front is moving these days, it is doubtful if he is very near it. It is quite possible that he is elsewhere or even nowhere but the interesting thing is that this man, who has managed to turn the world upside down, does not seem at all essential to the great political and military machine he has built up. It may be functioning without him and this would seem to indicate that if he is not dead, but should suddenly die, it wouldn't make much difference.

Some time ago, a report received from underground sources was received in London. It said that "Hitler either has been given an ultimatum by his generals, who pointed out his military blunders, or he is suffering from one of his hysterical fits and is in ill health as a result of his Russian reverses."

Recent Developments

What about these fits? They are no fiction but well-authenticated events. Before several witnesses he has frequently burst into tears, and in other ways given vent to utterly uncontrolled emotions. But these fits are of less importance than certain other likewise well-substantiated but not widely known developments which have taken place within the last year or two.

There are several stories which I heard from the lips of a man who has closely watched Hitler's career from its earliest beginning. The man is Fred Oechsner, a former colleague of mine. In fact, I was instrumental in having him sent to Berlin as correspondent for the Consolidated Press just about the time Hitler was beginning his political career.

Long before anybody else took Hitler seriously, Oechsner wrote to me: "This man is some day going to be the bull in Europe's china shop." Oechsner, who is now in Washington, told me the following story which he also repeats in his excellent book, "This Is the Enemy."

As you know, Hitler was always a teetotaler. He never drank anything but some very weak beer especially brewed for him and he only took sips of this pale beverage.

Recently his habits changed. "Persons who visited him at his headquarters early in the winter told me," Oechsner says, "that he was becoming grave and irritable and that it was not uncommon for him on a cold night to drink three or four glasses of grog. He also took occasional drinks of a Bavarian liquor called Enzian which is not unlike gin."

Now Oechsner is an exceedingly reliable reporter and when he says the Fuehrer finished three grogs in an evening, I believe it—also I believe that a man unused to taking alcohol must have been higher than Berchtesgaden when he went to bed.

Oechsner also said: "There is a German physician of international repute who believes that some day Hitler will have a brain disturbance of a serious nature. This physician has treated Hitler since 1921 and knows his physical condition as well as his personal life. It is his opinion that Hitler is an outstanding example of a half-trained, half-educated person with a phenomenal talent for absorbing and co-ordinating information and detail gleaned from other sources. This attention to detail and pattern, he says, is obvious in Hitler's drawings, in his speeches, his military campaigns. It is a phe-

nominal mental power but some day it is going to explode."

Suicide the End?

Without revealing the source, I have heard the opinion expressed by a man who has seen and met with Hitler many times and is exceedingly familiar with his life, that it is quite possible that a mental decline has started which, he believes, may end in suicide.

On my own score, I may say that when I heard Hitler deliver his famous speech at the start of the war in 1939 in which he said that he was going to the front and would lead Germany to victory, that he would not take off his uniform until this had been achieved, and in the next breath named his successors, I thought he was preparing for suicide.

I doubt if he is now dead. He may not even be ill but the thing is, there has been no report of any public appearance for a long time.

That, of course, is hearsay evidence—or long-distance diagnosis but what Oechsner reports comes from first-hand authority.

So Hitler may already be in a padded cell—and nobody seems to care!

Fourth Term—Does FDR Want It?

Will the President run for a Fourth Term?

A number of cross currents are definitely in motion, some directly moving toward an attempt to draft Mr. Roosevelt as candidate in '44; some which at present seem to be carrying him in the opposite direction.

One thing that many people fail to realize is the fact that when the precedent against a man serving in the White House for more than two terms was broken, the first olive was out of the bottle and the chief obstacle to a fourth term was removed. As has been pointed out, the American people never before wanted a man for a third term candidate, although twice before candidates would have made the attempt—Grant and Theodore Roosevelt.

When the first whispers for a possible third term for Franklin Roosevelt were heard, I talked to a seasoned political observer. He said: "The President doesn't want to run again but he will be persuaded to by his friends."

I make bold to state at this juncture that exactly the same statement can be made today with one modification: The President doesn't want to run for a fourth term but his friends are trying to persuade him to.

I feel sure that the President does not want to run again. I do believe he passionately desires to preside at the peace table. But some of his friends have a different view. As Joseph Tumulty, secretary to President Wilson, once remarked about the White House: "It's a nice boarding house, you hate like the dickens to move out."

Friends' Demands

Two things are acting in favor of persuading the President: One, this earnest and insistent demand of his "friends" who don't want "to move out" and some of whom honestly believe that it would be for the general good if the President stayed on. Their arguments are many.

The second factor and the one which could elect Mr. Roosevelt for a fourth term, if he does run again, can be expressed in the well-known slogan, "Don't swap horses while crossing a stream." It is the reasoning behind this homely expression which, of course, provides the most persuasive argument to any President.

On the other hand, if by 1944 Hitler has been defeated, the President might feel that he could serve even better at the peace table if he were not the head of a political party, if he were not bound by certain domestic policies which the head of an administration must administer with one eye on the votes in the next election.

I believe that if the President felt positively that he would be allowed to play the principal role in the peace-making, even though someone else were in the White House (perhaps a Republican), or if he felt that as President, he would be less effective as a peacemaker, he would not consider a fourth term.

HIGHLIGHTS . . . in the week's news

LONDON: "Take a towel with you when you go visiting" was, in effect, what Britons were told in a new set of rationing regulations. In announcing towel concessions for factory and medical workers, Hugh Dalton, president of the Board of Trade, said that in future "we must be prepared to take our towel with us if we go away to stay, or if asked to do so, to the hairdresser."

LOS ANGELES: Canned baby food is becoming more popular—particularly with adults, according to Sam M. White, secretary of the Southern California Retail Grocers' association. The reason, he says, is the present rationing system. The low ration point value of canned baby foods constitute their chief appeal. A purchaser can get a 4 or 5 1/2 ounce can for one point.

All rural women are being asked to enroll in the national Victory Home Food Supply program.

The brother of the king of Sweden, Prince Oscar Bernadotte, has resigned the chairmanship of the Swedish Young Men's Christian association. Reason—advancing age. He has held the post for more than 50 years!

One reason Russia is not so anxious to make peace with Finland is because 100,000 German soldiers would be released for duty elsewhere.

Twenty-two states have entered into co-operative arrangements with the Forest Service to develop a forest products marketing service for farmers.

BRIEFS . . . by Baukhage

Soldiers Trained as Weather Observers To Assist Army in Mapping Plans; Information Important to Bombers

The strategic and tactical importance of weather predictions, both short and long range, in waging the present war cannot be overestimated. This is particularly true in regions of the world where rapidly changing weather situations are characteristic throughout the year. Over the Atlantic ocean and in Europe changing weather is prevalent in latitudes from the coast of Italy northward. In east Asia, significant and frequent weather changes occur throughout the year in latitudes from Tokyo and Los Angeles northward; while over the North Pacific ocean, this is true from a line running from Tokyo and Los Angeles northward. Both Berlin and Tokyo lie within the areas where the weather element is of importance the year around. Therefore, any successful strategy aiming a blow at the heart of our enemies must include the weather factor.

To this end, courses have been established to train personnel for weather work in all parts of the world. Among these courses are those designed to train enlisted men as weather observers; enlisted men as forecasters to assist the weather officers; a weather reconnaissance squadron training course; and an aviation meteorological cadet course. In using the weather factor to determine the effectiveness of the air-ground team or the co-ordination of land, sea and air forces, the army air forces have evolved a few simple rules which have, in part, been verified from a study of the strategy and tactics employed by the enemy.

Clear Dry Weather Permits Attack by Air-Ground Team

1. In clear dry weather, the air-ground team can launch an attack most effectively. Under these conditions the attackers must have air superiority. These conditions permit the use of all types of air support, minimize the problems of observation and recognition of friendly and enemy aircraft and troops, and ensure the maximum mobility of ground forces.

2. Dry weather with low clouds and good visibility permits limited air-ground operations. The types of attack by supporting aircraft are restricted. This kind of weather is highly favorable to the operation of aircraft carriers even in areas controlled by land-based aircraft since the field of vision of the patrolling aircraft is greatly restricted.

3. Dry weather with extremely low clouds and conditions producing rather poor visibility can be used effectively for the consolidation of scattered ground units or the movement of ground forces into a position for attack. These conditions, even with rain, are favorable for the movement of an aircraft carrier into a position for attack when the weather improves. In both cases, the attacking forces are relatively free from observation or attack.

This war has shown that a detailed knowledge of existing weather conditions over the theater of operations, over enemy territory, and frequently over the friendly zone of the interior may be of great value to officers directing or planning campaigns or movements of personnel, motor vehicles, aircraft, or supplies. Usually the future weather is of more value than present weather, in planning, but for certain types of operations the current weather information may be valuable. Information, such as this, is needed to correct for weather effects on range and deflection of projectiles, drift of airplanes, and on the speed and direction of sound travel. It is of use in handling captive balloons and in landing and take-off of airplanes.

Reports Advise Army of Sudden Changes in Weather

The primary purpose of the army weather service is to provide reasonable accurate forecasts of future weather. A knowledge of present weather conditions is, for most types of operations of little value. It is of value in forecasting sudden marked changes and forecasts of the changes are not available.

All branches of the army need weather forecasts. An army that conducts operations without keeping its staff advised of prospective weather changes is imposing a se-

The two men are about to release a radio-meteorograph. This little instrument when carried aloft by the balloon will transmit radio readings of pressure, temperature, and humidity to a station below. There is also a parachute attached to bring the instrument back.

The weather forecaster must always keep in mind a chronological history of the weather passing his station. This soldier is looking over the weather maps to obtain a picture of what has taken place in the previous 24 hours.

Here the men are obtaining temperature and humidity readings. The man on the left is whirling a sling psychrometer in order to determine the relative humidity and dew point.

rious handicap on itself. The personnel, equipment, and supplies of a field army are usually not well protected against inclement weather. A squall, a thunderstorm, a heavy rain, or a strong wind seldom passes over a temporary army camp or bivouac without doing damage. Freezing weather, coming on suddenly, generally causes damage to equipment and supplies and discomfort to personnel.

The influence of weather may frequently be present in military maneuvers seeking to gain surprise in their execution. In air operations, restricted visibility and adverse weather conditions serve to provide cover for attacking aircraft during the approach to the target, and aid surprise assaults. An effective cloud layer at an altitude suited to the type of attack which is planned provides an ideal cover for approaching aircraft.

Weather affects the planning and execution of all aircraft missions. Lack of weather information may cause frequent failures of missions and many losses of planes and personnel. In general, every time a

flight mission is conducted the flight commander should have an accurate knowledge of weather conditions to be expected during the flight, otherwise both personnel and equipment may be subjected to unnecessary hazard.

All army air forces weather forecasting stations furnish medium and short range forecasts. Short range forecasts are the most accurate type of forecasts made. Therefore, they should be given to every flight commander just prior to his take-off. These forecasts should give the weather conditions to be encountered, including state of the weather, that is, whether the sky is overcast or clear or with broken or scattered clouds; the type and intensity of precipitation; the height of the ceiling; the visibility; the wind speed and direction, both at the surface and aloft; any hazards to flight, such as fog, icing areas, fronts, etc.; and any special phenomena, such as tornadoes. Medium range forecasts are used for planning flight operations. Also short and medium range forecasts are necessary in the case of a very long flight requiring 8 to 10 hours or more for completion. For long flights, if the weather is at all uncertain or changeable, the flight commander should endeavor to obtain, if possible, one or more additional short range forecasts by radio, especially for the period of landing and for the terminal of the flight.

Pilots must know the ceiling, amount of cloudiness, and types of clouds to be encountered on a flight for the entire route in order to plan and execute the flight properly. If a cloud ceiling exists, the pilot must either fly underneath it, fly on instruments in the clouds, or climb through and fly on top of the clouds. Flying at low altitude is usually hazardous and particularly so at night or in hilly or mountainous country with low visibility. Low ceiling or instrument weather at the point of takeoff should ordinarily be no hindrance to individual planes, provided the weather at the final destination is suitable for safe descent. However, instrument weather offers a very definite handicap to a formation of planes. The types of clouds also should be considered if instrument flight is to be made, as they will indicate the smoothness or roughness of the air. Instrument flight in clouds where thunderstorms or icing may be encountered involves a hazard to the aircraft that must be balanced against the military importance of continuing the mission. Thus, the pilot is much concerned with the ceiling and clouds to be found on every flight.

Clear Weather Is Needed For Reconnaissance Aviation

The primary mission of observation and reconnaissance aviation being to observe and report, their operations are facilitated by high ceilings and excellent visibility over the area where they operate. Reconnaissance aviation must operate great distances over enemy territory where weather conditions may or may not be known. Whether or not this weather is known will depend in a large measure upon the reconnaissance aviation itself since one of its missions will be to make weather reports from points over enemy territory. Bombardment aviation will also make a certain number of weather reports, and if these are sufficient in number and cover enough territory, it may be possible to make fairly accurate forecasts of weather for the following day. The capabilities of reconnaissance aviation in the execution of its tasks, are definitely limited by weather, particularly in the matter of visibility and wind. Their effect must, therefore, always be considered in planning missions to determine radius of operation and number of aircraft required.

Bombardment aviation has probably the greatest need for weather information. Bombardment units may, and frequently will, be called upon to perform their own reconnaissance. Like reconnaissance units, they may operate over great distances and return to their home airdromes with gas tanks nearly empty. A forecast before take-off of weather to be encountered upon return is essential. Bombardment aircraft may pass through much bad weather en route to and from their objective, but to avoid wasted effort it is very important that the weather be suitable at the objective for bombing, and that this be known before take-off. Objectives should be chosen, when possible, based on the weather forecast; that is, objectives should be chosen for which weather conditions will be most suitable.

Within the theater of operations, there will normally operate an air task force and a ground force. The air task force may have its units scattered throughout the theater. There are one or more air bases, one or more sub-air bases, and then the various combat units. If weather reports are required from points within an area where no weather stations are located, special observer stations must be established at these points. Such weather observer stations will be established, where needed, within both the combat zone and the communications zone.

BURMA

By Daniel De Luce

(WNU Feature—Through special arrangement with Collier's Weekly)

Greatest reservoir of fighting manpower to whip the Japanese lies in free, unoccupied China. For five years the Chinese soldier has proved himself every bit as courageous and clever as his Japanese enemy. He has hung on in the face of discouraging odds, lacking modern weapons and an air force.

Anglo-American arsenals should eventually be able to furnish him with these new arms and give him the support of a combined armada of airplanes.

However, "the day" is indefinite. In 1943? Perhaps longer. There is a lot of spade work to be done, for a great Allied offensive on the Asiatic continent.

It is required chiefly in Burma. And it is being planned right now by Generalissimo Chiang Kai-shek, General Wavell and General Stilwell.

Allies Need Burma.

The transfer of a thousand bombers and a thousand fighting planes from America to China could be made in seven days. But once having got the air fleet to China, the Allies would be little better off than before, unless they had Burma.

For the air force would need fuel—not a few thousand gallons flown laboriously over the Himalayas, but many thousand tons.

And where is the oil for the future planes of China? In Burma. "Oh," you say, "weren't the Burma fields scorched by the British? Or was that just another newspaper story?"

Yes, the Burma fields were scorched, thoroughly scorched. At the moment they're useless. But listen to the man who did the scorching.

"If the Japanese brought in 15,000 specialists and 50,000 tons of equipment and machinery, they could get Burma producing again within a few months. But they have neither the specialists nor the equipment. We have both. We can soon have the wells flowing—if and when we recapture Burma."

Scorching of Burma.

For the story of the scorching of Burma, let's begin looking into a little red cloth-covered notebook which this itinerant war correspondent bought in Mandalay for ten annas, before the ships were bombed and burned down on Good Friday last year. I had it in a sweaty pocket of my khaki shirt when I jumped through Yenang-tuang, oil capital of Burma, on Thursday, April 16, 1942. Yenang-tuang in Burmese, means "stream of the smelly waters."

Some centuries ago, silk-skirted natives scooped up the pungent black liquid and burned it in crude lamps at home. Came the white man. In the last 60 years thousands of derricks sprang up on the drab hills. Burma oil, a million tons every 12 months, began lighting many a lamp in greater Asia.

Then came the Jap. He was about 30 miles south of the oil capital and pressing hard last April when I walked into the main oil-field headquarters and met a lean, hard, eagle-nosed English civilian loading his .38 army revolver.

He was Walter L. Forster of the Shell Oil company at Cairo. He had supervised the demolition of the Rangoon refineries the previous month, then calmly departed and was now in central Burma to finish similar assignments here.

At work or play, Forster likes dynamite. Knowing his specialty, the British government had sent him late in 1941 to Russia, to advise the Soviet engineers in their program of scorching the earth. He quickly decided that the Russians knew more than he did, but he stayed to learn their methods, and visited secret areas of the Caucasus.

He remarked afterwards that the Reds had carried out factory wreckings in one day that Anglo-American experts had forecast might take six months.

"But I wish the Russians could have seen our job at Rangoon," he mused. "Smoke up to 15,000 feet. Vapor up to 19,000 feet. Not a drop of oil left for the Japs, nor a piece of workable machinery."

After Rangoon was gone, Forster tackled the pipe line which had run more than 300 miles down-country from the Burma oil fields. He plugged the pipe with cement at river crossings, smashed the section pumps, wrecked bridges. Then he turned to the oil fields.

The last job, he said, was blowing up the big powerhouse. "I've got 6,300 gallons of oil in drums stored above the transformers," he said. "Got oil piped in here to the main room, too. And the jets will turn on after the explosion. Nice fire we're cooking up!"

Slip Covers for an Unusual Chair That You May Desire to Protect

FIT COVER AROUND CHAIR SUPPORTS, AND FASTEN WITH SNAPS—MAKE SIDE OPENINGS LONG ENOUGH TO SLIP OVER WIDEST PART OF BACK

THIS cover was a twofold conservation measure in the most literal sense. Its purpose was not to cover shabby upholstery but to protect handsome damask from everyday wear and tear.

If you have an especially difficult chair to cover, you will save time by fitting a muslin pattern first. Then you can snip until it fits perfectly around arms and other supports and, if you make a mistake in the pattern just stitch a patch over it and start over again. Before removing the pattern from the chair, plan the openings so that they will lap neatly and be sure they are long enough. In the finished cover either bindings or facings may be used for irregular edges.

NOTE—This chair is from Mrs. Spears' Sewing Book 3, which also contains directions for smart new curtains; and numerous things to make from odds and ends, as well as new materials. To get copy of Book 3 send name and address with 15 cents in coins to:

Terror Deafens

The man who is roused neither by glory nor by danger it is vain to exhort; terror closes the ears of the mind.—Sallust.

It will help keep your shoes if you put them on shoe trees or stuff the toes with paper when they are not being worn. Always wipe them dry of moisture and dirt after exposure.

Grease can be removed from an iron by rubbing it with corn meal.

Do not mix new milk with old, except when it is to be used immediately.

Rub over the inside of a cushion with hard soap before you fill it. Then the points of the feathers will not come through.

An occasional application of oil will keep leather in chairs and suitcases from cracking.

Used brooms can be made stiff and clean by dipping them in a pail of boiling soda water, and drying them in the sun. If the broom is sprayed or sprinkled occasionally with a little kerosene, it gathers the dust much better.

Admirals may be admirable, but that isn't where the word comes from. It comes from an old Arabic word "amir-al" meaning "commander of." That's what the Admiral is, the top-ranking officer in the Navy. Top-ranking cigarette with our Navy men is Camel—the favorite, too, with men in the Army, Marines and Coast Guard, according to actual sales records from their service stores. Camels are their favorite gift, too. Local dealers are featuring Camel cartons to send anywhere to any member of our armed forces. Today is a good time to send "him" a carton of Camels.—Adv.

PLANT FERRY'S VEGETABLE SUCCESSES FOR A BETTER GARDEN

This is the year to know these seeds you plant—it's no time for guessing. Ferry's Seeds have proved their ability to make every inch of garden space count in top yield and fine flavor.

W. M. BELUE

Friends were deeply grieved to
learn of the death of Mr. W.
M. Belue at his home near Hol-
cut, February 25th.

Mr. Belue was 65 years of
age. He spent most of his life
in Tishomingo County and had
lived near Holcut for many
years.

He is survived by his wife,
Mrs. Ada West Belue, nine sons,
Talmadge, Eugene and Billy of
Holcut; Wallace, of Murray,
Ky.; Pvt. John Belue of Camp
Shelby, Miss.; Pvt. George Belue
Shreveport, La.; Fred, of
Perryville, Tenn.; Sgt. Robert
Belue of Fort Leonard Wood,

Mrs. T. L. Lovell of Town
Creek, Ala. was a week end
guest of Mr. and Mrs. R. S.
Williams.

Mo., and Sgt. Sidney Belue of
Camp Carson, Colo., four daugh-
ters, Mrs. Ila Shubert and Max-
ine Belue of Michigan City,
Ind., Mrs. Pauline Waddle and
Mrs. Irene McCoy of Holcut,
one brother, Mr. Bob Belue of
Tishomingo, R-1, one sister,
Mrs. Mary Crisamore, also five
grandsons and two grand daugh-
ters.

Funeral services were held at
Cross Roads cemetery Friday
at 2 P. M., with the Rev. Jim
Hardwick of Booneville, in
charge. Pallbearers were How-
ard Hester, Jesse Callicut, Clint
Wigginton, J. E. Ticer, Lloyd
Thompson and Emmitt Simms.
Cutshall was in charge of
funeral arrangements.

Mrs. R. R. Hamilton

Mr. and Mrs. Whit Wilson visited Mrs. D. H. Atkins Sunday.

Mr. and Mrs. Arthur Ray and infant son, of Florence, were week end guests of Mrs. Ray's parents, Mr. and Mrs. W. S. Brown.

Mrs. Tom Lea and son, Tom, of Columbus, Miss., have returned home, after a visit with Mrs. Lea's parents, Mr. and Mrs. B. F. McRae.

Little Jimmie Noel Yarber celebrated his third birthday on March 13th with a birthday party. A number of little friends were entertained with games and delightful refreshments, and showered Jimmie with numerous gifts. He is the son of Mrs. J. N. Yarber.

Mr. John D. Dawson has been visiting in Iuka and vicinity for several days. He returned to his work in Tusculuma on Monday.

Mr. and Mrs. John H. Weaver are announcing the birth of their son, born March 15th, and weighing 12 pounds. Mrs. Weaver is the former Elizabeth Cox.

Mr. John Webb is ill at the home of his mother, where he has been confined for several days with flu.

Mr. and Mrs. Paul Edmondson and Linda Lee left last Friday for Charleston, S. C., where Mr. Edmondson is working. They had been visiting their parents for two weeks. Mr. and Mrs. C. E. Edmondson, of Iuka, and Mr. and Mrs. S. H. Daniel of Maud, Ala.

Mr. and Mrs. George Page of Memphis, spent the week end in Iuka with Mr. and Mrs. Harrell McDonald.

Donald Atkins has returned to Camp Peay, Williamsburg, Va., after having spent several days with his mother and sister, the former Mrs. D. H. Atkins, who is ill.

Mr. James Jackson and son, James, Jr., of Memphis, visited home folks the past week end.

Club Notes

The Thursday Study Club met in the home of Mrs. J. A. Roane, Jr., last week, and the annual election of officers was held. Serving as President will be Mrs. R. W. Carter and assisting her as vice-president is Mrs. J. A. Roane. Other officers are Mrs. J. C. Jourdan, Jr., as treasurer; Mrs. Wm Brinkley, secretary; Mrs. Harry Graham, reporter; Mrs. John Payne, parliamentarian, and Mrs. I. M. Jackson, recording secretary. The home was tastefully decorated with bowls of spring flowers and at the end of the business meeting, Mrs. Roane served a salad plate with coffee.

Mrs. J. H. Allen was hostess to the Thursday Club on March 11th, when Mrs. Robert Hobson, chairman of the program for that meeting, presented her husband to the club, who spoke on the Food Situation today. Mr. Hobson gave an enlightening and practical discussion of the food problem as it is presented to the woman in the home, and urged home production of every possible food, to preserve the health of our nation during the imitations brought on by the needs of war. A social period followed the program.

The next meeting will be with Mrs. Webster Price.

CHURCH NOTES

Rev. R. G. Jackson, pastor of the Iuka Pentecostal Church, will preach at the Pleasant Hill School, three miles south of Iuka, Sunday afternoon, March 21st. The service will begin at 2:30 o'clock.

At a meeting to begin Sunday, March 21st, Rev. M. N. Hamill, will do the preaching in the Mt. Evergreen Church, 2 miles north of Iuka.

On Friday, March 12th, Mrs. ill Curtis and Mrs. Mary Adcock were joint hostesses at a shower for Mrs. Woodrow Cornelious, in the home of Mrs. Curtis. Mrs. Cornelius received any lovely gifts, from the following guests: Mrs. Joe Ross, Mrs. P. B. Smith, Mrs. Lester Montgomery, Mrs. Robt Lomenick and daughter, Babby, Mrs. Truella Medley, Miss Gladys Cornelius, Miss Frances Adcock, Mrs. Susie Smith, Miss Mamie Smith, Mrs. Elmo Sander, Mrs. Ernest Hampton and Mrs. Earl Comer. Many other gifts were sent by friends who were unable to attend. The bride was also the recipient of a beautiful friendship quilt top. Sandwiches and hot chocolate were served the guests by the hostesses.

TEA TABLE CHATTER
by Tina

In spite of a quiet two weeks, during the well supported meeting in the Baptist Church, Tina has learned via the proverbial grape vine, of several little interesting bits that ought to go good with tea and crumpets: Confusion should have reigned (but it didn't) when Allie Rhine had the Harry Grahams over for the most delicious fish super Sunday evening; even the chicken pie had to take second place to that fish; but the confusion was because of the four Harrys at that table the "big and little" Harry Rhine and ditto in the Graham family. This is a good time to mention the most sincere tribute paid Allie for her "good works" by a group of our best colored folks, recently. Tina was impressed that such works are recorded in heaven, and they certainly are moulded in the memory of these people who have been the recipients of her concern. Georgeous Gladioli in the Methodist church Sunday morning, were placed there in memory of her father, by Annie Ford McKnight Wight. Flora Lee Brinkley has a dress that is fashioned for a portrait, and she looks like one from a miniature, when she wears this black model with a blue (very soft) front, with a jewel neckline of black, that is actually a frame of her features--absolutely lovely. More people are excited over the arrival yesterday of Minnie and Marcia Brown!--have to remind myself that they aren't my own kin, this excitement has permeated the whole town so.

Have you seen that adorable lapel watch that Lucy Roane is wearing--gift from one of Jack's sisters I believe. Elizabeth Pyle had a delightful benefit party last week--for the Thursday Study Club to make up their donation to Red Cross. Another such party done on a big scale has been called off, for this Friday night, due to illness and other interferences--the Club will make their quota with increased personal donations--a splendid job and one to be commended. Bob Hobson gave the Thursday Club a jolt, albeit a very pleasant one, when he appeared on the program last week, discussing dietetics--a fine discussion, ably done, and well received by the members--his wife's idea for a surprise for her club. It is stimulating to have a man's viewpoint on such occasions, and I know of no better field on which to hear them, than the question of food. Bob is particularly well informed on this line and gave out some information worth remembering. Zola Graham is struggling with laryngitis, and is being amused with people whispering back to her, when she tries to talk. She is remaining as close at home as possible to avoid more serious complications. Carlton Woodley looks fine since his sojourn down on the gulf, and little Margaret June celebrated her return with a tea party for her friends Friday afternoon. They had a gay time, and Tina saw two of them having more fun, putting little make-believe boats in a little pool of water in the yard--one of them was having trouble keeping her party shoes dry, but she managed.

Pauline Stennett, who is helping her husband, during a shortage of "man power" in the store, is beginning to think that nursing the sick, is a snap compared to waiting on "trade" in a large store. Little Toni Gaines is looking chipper again after being ill for a while. And when have you seen a handsomer young man, than Tommie the young son of Mary Leslie (McRae) Lea, who with his mother, has been visiting his grandparents--unless it is the young sons of Lula Murrell Gaines. Her oldest boy stepped out in a keen knicker suit last week, that had other mothers eyeing him speculatively, him as handsome as all get out. For three weeks a line in this column has had to be withdrawn at the last minute because that delightful spring weather just wouldn't hold--so this week, weather can do what it pleases--Tina will wait for spring!

DEATHS

Mrs. Mary E. Blakney, aged 78, died at the home of her nephew, O. O. George, 2 miles north of Burnsville March 9th. Funeral services and burial 3 p. m., March 10th at Antioch church. Rev Jones of Corinth, officiated. Survived by nephew O. O. George and niece, Mrs. Honeycutt.

William V. McAuley, aged 67, died at his home in Snowdown community, having been in ill health for some time. Survived by wife, Ida McAuley, daughter, Mrs. Jim Crouse, and son, Henry McAuley, all of Snowdown community. Rev. Woodson was in charge of services at Snowdown Methodist church Sunday, March 14th, burial at same place. Cutshall was in charge.

TISHOMINGO TIPS

Mrs. Oscar Nixon, Paden, Miss., and son, who is in the service, visited Miss Cora Benson last Friday.

Harold Waldrep, who is stationed in New Orleans, La., with the Coast Guard, is spending a few days with his parents.

Wayne Lindsey, student of the University of Georgia, spent the week end with home folks.

Miss Nora Rhodes spent a part of last week in Memphis with her brother, K. M., who will enter the service immediately.

Mrs. Roscoe Fugitt is visiting her daughter, Mrs. Clyde Smith in Fayetteville, Tenn.

Mr. and Mrs. John Trim were shopping in Booneville last Saturday afternoon.

ings—due to functional monthly
disturbances.
Taken regularly—Pinkham's Table-
ts help build up resistance against
such annoying symptoms. Also,
their iron makes them a fine hema-
tic tonic to help build up red blood.
Pinkham's Tablets are made espe-
cially for women. Follow label di-
rections. Worth trying!

**Sentinels
of Health**
Don't Neglect Them!
Nature designed the kidneys to do a
marvelous job. Their task is to keep the
flowing blood stream free of an excess of
toxic impurities. The set of living—life
itself—is constantly producing waste
matter the kidneys must remove from
the blood if good health is to endure.
When the kidneys fail to function as
Nature intended, there is retention of
waste that may cause body-wide dis-
turbances. One may suffer nagging backache,
persistent headache, attacks of dizziness,
getting up nights, swelling, puffiness
under the eyes—feel tired, nervous, all
worn out.
Frequent, scanty or burning passages
are sometimes further evidence of kid-
ney or bladder disturbance.
The recognized and proper treatment
is a diuretic medicine to help the kidneys
get rid of excess poisonous body waste.
Use **Doan's Pills**. They have had more
than forty years of public approval. Are
endorsed the country over. Insist on
Doan's. Sold at all drug stores.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

OUR LORD'S INTERCESSORY PRAYER

LESSON TEXT—John 17:1-8, 18-26.
GOLDEN TEXT—"Holy Father, keep
through thine own name those whom thou
hast given me, that they may be one, as we
are."—John 17:11.

There are some times and places
so sacred that one is instinctively
hushed into reverent devotion. When
Christ prayed in holy intercession (as
recorded in John 17) on the night
before His suffering His disciples
must have been lifted into the very
presence of the Eternal One. It was
a holy experience.

He prayed for Himself, but even
more did He pray for His believing
followers. To know that someone
is praying for us is indeed an anchor
in a time of storm, a strong help
in the hour of conflict or of service
for Christ.

But to know that the Master
prayed for you and me—that is
enough to send us, like the disciples
of old, out to face an unbelieving
world in His conquering name. He
prayed for Himself—and He prayed
for me!

I. He Prayed for Himself (vv. 1-8).
He looked up and said: "Father,"
and then He was ready to pray. So
close was He to God that there was
just this simple recognition of their
communion. In Christ are we not
as close as He?

What did Jesus ask for Himself?
At first thought it seems a little un-
usual that He asked

1. For Recognition of His Divine
Glory (vv. 1-5).

Why would He who had just given
the disciples an example of and an
admonition to humility desire to
have His glory manifested? Be sure
it was not a matter of selfish pride.
He had finished His work (for He
counted redemption as complete
throughout His prayer), and now the
glory which He laid down when He
came to earth (Phil. 2:6-8) was to
be resumed.

He wants man to see Him now not
only as the compassionate Son of
man, but the glorious Son of God,
able to save. It is right that the
glory of Christ should be magnified
and recognized by the whole crea-
tion. He is worthy!

2. For the Manifestation of His
Grace (vv. 6-8).

The Father had given Christ the
heart devotion of those who believed
in Him. Note that their faith rested
on the name of God (v. 6), and
upon His Word which had come to
them and to us through Christ.

He recognized their position and
standing in Him and established it
before God and man. He then
prayed for them (read vv. 9-17) that
they might be kept in an evil
world as a testimony to the grace
and power of God in the human
heart.

This leads to His intercession for
all believers.

II. He Prayed for All Believers
(vv. 18-26).

Christians are not simply the
avowed adherents to a particular
form of belief, they are "sent" ones.
As the Father sent Him into the
world, "even so send I them into
the world," said Christ.

Christ has gone to be with the
Father, but He has left those who
believe in Him as His witnesses, His
representatives. For this they need
holiness. He prayed:

1. For Their Consecration (vv. 18,
19).

For their sakes He consecrated
Himself. Surely if He needed it, we
do far more. It is not only His will
for us, but His prayer. How won-
derfully that prayer was answered
we see as we look back over the
intervening 19 centuries, from His
immediate disciples on through the
martyrs, the missionary pioneers of
all ages, the faithful preachers and
teachers of the gospel, yes and "liv-
ers" of the gospel too. He knew,
He prayed, God answered. Are you
in that blessed host of consecrated
believers?

2. For Their Unity and Glory (vv.
20-26).

There is a refreshing simplicity
about the Christian faith which is
utterly different from all the com-
plications which man has prepared
and superimposed upon it. Essen-
tially it is a matter of God having
sent His Son into the world to be the
Redeemer of men. He and the Fa-
ther are one, and so we are all one. We
who today believe are included (read
vv. 20-23).

This is an inward unity of the
Spirit, not an outward union of or-
ganizations. The answer to our dif-
ficulty is not the dissolution of de-
nominations (although there do
seem to be far too many subdivi-
sions, too), but the uniting of all
groups in a oneness of love and de-
votion to Christ, and a united emphasis
on the gospel.

There is something more here.
This unity puts Christ's followers
into the place where His glory may
be revealed in and upon them. It is
His prayer that we should behold
in our Saviour the glory which God
had given Him because He loved
Him before the foundation of the
world.

BOMBS BURST ONCE

By GRANVILLE CHURCH

W.N.U. SERVICE

THE STORY SO FAR: Jeff Curtis and
his wife, Lee, are already on their way
to Tierra Libre when he receives a note
from Zora Mitchell warning them not to
come. When they arrive in Tierra Libre
they find both Zora and her husband
dead. It is Mitchell's job as chief en-
gineer for a fruit company that Jeff has
been called to fill. Later Jeff's friend
Bill Henderson is killed, and Jeff sus-
pects his employer, Senor Montaya, of
murdering him and the Mitchells be-
cause they had found a clue to the strange
things going on at the plantation. Other
sinister figures are the company chemist,
Dr. Toenjes, and the flyers, Ryden and
Lanestock. A man named Collins ar-
rives from the Canal Zone to see Mitch-
ell, and Jeff hires him without arousing
Montaya's suspicions. A talk with Jerry
McInnis discloses that Montaya is part
German and is dealing with the Nazis.
Collins reveals his identity as a U. S.
naval intelligence officer. When he and
Jeff discover hidden German bombers,
he realizes that there will be trouble. He
has just persuaded Montaya to let Lee
and the children leave "for a few days."
NOW CONTINUE WITH THE STORY

CHAPTER XVIII

"Bueno, bueno," Montaya finally
said, more smoothly. "There is no
need of this heat. It will be only for a
day or two. But understand, this
visit must not be used as an open-
ing wedge for regular contact with
the Associated people. That I will
not have during our construction pe-
riod."

His dignity recovered, he turned
to Emilio, who had been standing by,
staring incuriously into the distance.
"Help to get Senora Curtis and
the children across to Riverbend."

Curt mounted the steps. At the
dispatcher's office he put in a call
for his house at San Alejo.

"Hiya, Lee. Surprise. Pack for
yourself and the kids. You're visit-
ing Jerry and Marta for a day or
two. They're having an anniver-
sary dinner tonight."

"But Jeff, what anni—"
"I'm sorry I can't go. As I told
you, I'm completely tied up until
the new shovels are in operation.
Anyway, you have a good time for
the both of us. I'm sending the car
for you now. Can you be ready in
forty minutes?"

"I think so, dear, but—"
"No 'buts,' I can't go and that's
that. If you wait for me you may
never see them. There's no telling
when I can get a day from the job."

He hung up. This last should tell
Lee the urgency of the situation
without giving the operator—un-
doubtedly listening in—anything to
chew on.

But Lee reached Tempujo by
noon. The kids bounced about in
excitement, clutching at Curt. He
turned them over to Emilio, togeth-
er with the three small bags Lee
had brought.

Then he held Lee close, whisper-
ing while pretending to kiss her.
"Don't look so anxious, sweet. Keep
a clear face. Everything's under
control, and I'll be with you sooner
than you think."

He managed to slip into her palm
a note folded tightly. "For Jerry."

Curt then handed Lee into the
boat and watched the crossing. He
saw her met on the other bank—
that would be Jerry, God bless him!
—and they waved across at each
other.

Monahan had been all day at the
tractor-shovels. Their progress had
been slowed today by more difficult
terrain. More filling, more matting
had been necessary. He returned to
Tempujo along with Curt and Emi-
lio, and after the three had show-
ered and changed clothing, they had
supper together. Collins was finish-
ing his at a table by himself. He
looked a good bit fresher than he
had this morning. He'd shaved and
it was clear he'd slept all day.

After supper Curt went to his of-
fice, followed as usual by his body-
guard.

Eight, nine, ten o'clock came,
and still Curt applied himself. There
was plenty to be done, he might as
well do it. Emilio looked in on him
once, annoyed but making no com-
ment. Curt merely looked up, then
back at his desk again.

Ten-thirty. Curt rolled up what
prints he'd been using, stacked his
papers. He came to the door of the
drafting room, stretching and
yawning. In the middle of the
stretch he stiffened. Emilio looked
up, instantly alert—almost suspi-
cious. Curt's eyes, without having
turned his head, seemed to be pierc-
ing the darkness beyond the porch.

He banked on Emilio's drowsiness
to keep him from realizing immedi-
ately that no one can see into dark-
ness from a lighted space. In a
low voice, keeping his lips stiff, Curt
said, "There's somebody out there,
out behind those palms. Size and
shape looks like—Collins, I'd say.
Put out your light."

As he spoke he reached behind
him inside the door of the drafting
room and switched off the lights
there. Emilio's reaction was to snap
off the table lamp and move catlike
to the door, reaching for his gun.

Then Curt struck. The butt of his
own gun caught the native behind
the ear. Emilio went down without
a sound.

Curt hauled the unconscious man
into the bedroom and shut the door.
He closed the hinged bamboo shut-
ters over his window, then turned
on the light in the adjoining shower
room and left that door open a
crack.

There was no rope available, so
he ripped a sheet into strips to bind
the man's hands behind him, tie his

feet, his legs. He soaked these
strips in water so they couldn't pos-
sibly be worked loose. He fashioned
a gag, pried open the teeth, secured
it in place. Then he picked up the
inert form and tossed it on the bed.

Before snapping off the bathroom
light a glance at his wrist showed
it was ten-forty. He'd better get
the crew together. Jerry should be
on this side by now, to meet Mona-
han upriver away from lights.

On Sunday nights Tempujo set-
tled down earlier than on Satur-
days. Already most of the resi-
dence lights were out, and only one
end of the mess-hall showed activi-
ty. His eyes now adjusted to the
dark, Curt could see through the
screen door what looked like two
trunks to the palm tree in the yard.
"Collins?" he called softly.

"Yo."

Curt picked up a camera and flash
bulb he'd set apart earlier, then
let himself out and down the short
path.

For several minutes neither
spoke, then as Curt was grumbling,
"Wish they'd hurry, I'd like a
smoke," Collins touched his arm
and pointed in the dimness.

Curt granted, "Yeh, that's them."

Two figures were making their
way toward the bungalow, taking
advantage of every patch of heavy
darkness. The four men joined
forces.

"Lee and the kids?" were Curt's
first words.

"Okay," McInnis answered. "By
luck, the San Timoteo's taking on

Emilio went down without a sound.

fruit. They're aboard now. The
Old Man's given orders to speed
the loading and be ready to pull
out at daylight with whatever load
they have by then. He'll get heck
from Distribution," McInnis chuck-
led, "but I guess his shoulders are
broad enough."

Monahan stopped them at a cache
he'd prepared earlier in the evening,
and all four shared the load—the
big bundle of dynamite, the three
cans of black powder, the fat coil
of fuse.

Getting to the motorshed and run-
ning a car outside the yard limits
unseen proved easy. Once under
way, Curt sketched a quick picture
for McInnis of what they'd found
last night, what they were headed
for.

McInnis granted a couple of times,
and at the end said, "Okay, what's
the program?"

Curt went over it. At one point
Collins interrupted.

"We'll get there about midnight.
Monahan's job is set for one. Not
sure that'll be time enough for me.
Got to study those fuse mechanisms.
Chances are they'll be simple
enough, but I can't be sure."

"Okay, another half hour, think?"

Collins considered. "We'll have
to chance it," he said reluctantly,
"can't take all night. Anyway, these
explosives will do the job on the
planes in case I can't set the bombs
for explosion. Yes, make it one-
third."

"Okay, got it," said Monahan.

"Another thing," Collins went on,
"once you men get the dynamite
planted you'll have to clear out, I'll
finish priming the bombs alone.
Then if anything goes wrong we
won't all go halos. You'd be no
use to me anyway."

"Guess you're right," Curt
growled. "Well, we can't all be
heroes," and he mentally saluted
the Navy man.

Midway across the flats he stopped
the car to climb a pole and cut the
two telephone lines—the dispatch-
er's line and the general office link
between San Alejo and Tempujo.

Nothing happened to impede
them. They reached the foot of the
Quebrados in good time, de-
spite running without lights. There
Monahan melted into the night to
grope his way up a trail.

A wide ditch circled the foot of
the Quebrados, a catch basin to

carry off the torrential rains of the
wet season as they flooded down
the mountainsides. A wooden bridge
carried the tracks across this chan-
nel. The three men quickly pushed
the car through the airfield spur
and mainline connecting tracks un-
til it was headed for the river again,
and pushed it back across the bridge
so it was clear for the run to Tem-
pujo.

As Curt and McInnis were load-
ing themselves gingerly with ex-
plosives—the dynamite and two cans
of powder—Collins spoke up.

"It won't take all three of us to
break in. I'll be planting this last
can to knock out that bridge behind
us. Have that much done."

"Good."

Curt cut a length of fuse for the
job, took the rest of the coil, and
with McInnis got under way for the
hidden hangars.

They reached the fence and Curt
led the way cautiously to the spot
where he'd broken through last
night. He played his flash along the
ground. Good. The leaves and de-
bris scattered over the soft fill of
the hole he'd used before was undis-
turbed.

"Yeh, but I don't like this, Curt.
Looks too easy. I can't believe they
don't keep some kind of watch.
You would, I would, they're not
dumber, are they? You could have
got through last night by sheer
luck."

"I know. It's been in my mind,
too. But there's nothing we can do
about it except keep alert."

McInnis' words were prophecy. It
was as they were hauling at the
strip of corrugated sheathing—a
noisy job itself—that they heard
the running feet. So there was a
patrol maintained! The two men
jumped away from the wall and fell
flat in the dry grass. The feet
pounded around the end of the build-
ing, a flash played back and forth
and picked out the hole in the fence,
the sprung sheet.

"Was ist das? Antworten sie!"

The man ran to the fence, then to
the break in the hangar wall. The
sheet had not been ripped sufficiently
to admit a person, so the man
turned from the building and played
his light about the space between
it and the fence.

The two Americans couldn't possi-
bly avoid detection long. Curt made
a cautious move for his gun and the
rustle of the dry grass gave him
away. The guard shot wildly in that
direction and doused his flash.

Curt and McInnis rolled apart in-
stantly, but neither used his gun in
the blackness for the flash would
give away his position. The guard,
too, after the first wild shot, held
his fire. But his movements showed
he was edging toward the fence.

"Alarm wire!" shouted Curt.

"Along the fence-top! He's trying to
reach it!"

The guard lunged for the fence,
but there came a shot from beyond
it, from the other side. Collins! A
quick stab from Collins' flashlight
showed the German close to the
fence, his arm upstretched, the man
ready to spring. Another shot, and
the man went down.

"Finished my job at the tracks,"
Collins called anxiously, "and heard
this guy as I neared the fence. Then
the shot. Are you okay?"

"Yes," cried Curt. "There's a
hole in the fence, Collins. Get busy,
you guys. I'll see if the shots car-
ried."

He raced around the end of the
building and to the front. He had a
clear view to the other end of the
field. A few night lights showed, as
they had last night. Under one of
these, the one outside the clubroom,
two figures stood like statues. Men
listening. Presently they seemed to
relax. They moved out of the light,
not fast as though alarmed, and the
clubroom lights snapped on. Curt
relaxed, too. The shots had been
behind the buildings here, the sounds
wouldn't have carried sharply to the
other end—he hoped. He returned
to the others.

Collins and McInnis had forced
entrance to the hangar. All three
had flashlights tonight, and Curt
found McInnis taking a quick look-
see for himself. Collins was at the
bomb room door, forcing the lock.
Curt and McInnis joined him.

Inside the long partition they spent
a moment studying the layout. The
cylindrical casings were pointed at
the bulkhead, which was constructed
of thick planks. When assembled,
there'd be a space of about two feet
between the noses of the bombs
and the heavy wall.

"Okay, men, it'll work," Collins
said. "Get busy on your jobs, I'll
handle mine."

The room was wired with lights.
Since no beam could escape out-
side, Collins snapped the switch and
immediately got to work on a study
of the first tail fuse at hand.

"Huh," he said dismally, "they're
the arming vane type. Well, guess
I can revolve them by hand. Nose
piece, I understand that well
enough. Pull the pin and they're
set for impact."

These bombs were designed for
loading on planes, assembled, but
not set for explosion. On release
from the plane, the arming pin of
the nose fuse would have to be
pulled, to free the mechanical re-
straint that prevents the fuse from
firing the detonator. In the case
of the tail fuse, however, that
"brake" would be released auto-
matically by the revolution of the
arming vane as the bomb fell
through the air.

Pull the Trigger on Constipation, with Ease for Stomach, to

When constipation brings on dis-
fort, sore throats, stomach upset, bloating,
dizzy spells, gas, coated tongue, and
breath, your stomach is probably "try-
ing the blues" because your bowels don't
move. It calls for Laxative-Senna to
pull the trigger on those lazy bowels,
combined with Syrup Pepsin for perfect
five to your stomach in taking. For years
many Doctors have given positive pre-
scriptions in their prescriptions to tone
medicine more agreeable to a tone
stomach. So be sure your laxative con-
tains Syrup Pepsin. Insist on Dr. Cal-
well's Laxative-Senna combined with
Syrup Pepsin. See how wonderfully
Laxative-Senna wakes up lazy nerves
muscles in your intestines to bring a
come relief from constipation. And
good old Syrup Pepsin makes this laxa-
tive so comfortable and easy on your
stomach. Even if you're a child, you'll
taste of this pleasant family laxative.
Take Dr. Caldwell's Laxative-Senna com-
bined with Syrup Pepsin, as directed
label or as your doctor advises, and
world's better. Get genuine Dr. Caldwell's

HOUSEHOLD MEMOS... by Lynn Chambers

Today's Cake Fixings Are Simple, Food Saving
(See Recipes Below)

Bake Your Own!

Those of you who have chosen homemaking as a career can set aside a half day for baking your own goodies right in your own oven. There are few things nicer than coming into a kitchen full of busy bustling, testing the cake, plumping fat loaves of bread on racks to cool, or packing cookies in fresh wax paper for pantry shelves—for those fine boys in the service!

When sugar rationing first came into the picture, most of us feared that it would not allow enough for home baking needs, but we have found ways to make sugar stretch. Or, perhaps we should say, corn syrups and honey to make baking possible.

With eggs up in price and fats becoming scarce, we have changed our recipes to fill these needs, too! Today's recipes may not call for the quantity of materials that yesterday's did, but they can make just as tempting a product.

***Hot Water Sponge Cake.**
(Makes 2 8-inch layers)

1 cup sifted cake flour
1 1/2 teaspoons baking powder
1/4 teaspoon salt
2 eggs
1 cup sugar
1/2 teaspoon lemon juice
6 tablespoons hot water

Sift together flour, baking powder and salt. Beat eggs until thick and fluffy, about 10 minutes. Add sugar gradually, beating constantly until thick enough to hold a soft peak. Beat in lemon juice, add hot water, and beat until thick after each addition. Fold in flour in small amounts. Bake in ungreased tube pan or lightly greased layer-cake pans in a moderate (350-degree) oven. A tube cake takes 45 minutes to bake, layer cakes 25 to 30 minutes.

Ever tried a fragrant gingerbread baked in a ring? The slices can be fairly thin and the cake will really go far! Or, you can fill the center with apple sauce and serve as a dessert!

Gingerbread Ring.

1 cup molasses
1 cup sour milk
2 1/4 cups sifted flour
1 1/2 teaspoons baking soda
2 teaspoons ginger
1/2 teaspoon salt
1 egg, well beaten
1/4 cup melted shortening

Mix milk and molasses. Sift dry ingredients. Add to milk and molasses, then mix in egg and shortening and beat until smooth and

Lynn Says:

Tie a String Around Your Finger: The technique's different when you do your own vegetables—and you must keep these pointers on tap if you would get the most out of them:

Peel potatoes thinly—their mineral treasures are hidden right under that skin.

Use green vegetables as soon as possible after buying. They lose quantities of their vitamin C just sitting and being exposed to air.

Add dressing immediately to vegetables and fruits after cutting them. The coating prevents some vitamin loss.

Put away the soda box when cooking green vegetables. It's alkaline and destroys vitamins.

Shell peas or lima beans only just before using. Wash leafy greens just before cooking. The percentage of vitamin loss will be lessened.

Start cooking frozen foods before thawing. It is believed that less vitamin C is destroyed by that method.

Whole Wheat Bread Butter
*Hot Water Sponge Cake
Peaches Beverage
*Recipe Given.

creamy. Pour into a greased pan and bake in a moderate oven 30 minutes.

It might be said of this cookie that it's spice and all things nice—but you'll notice I didn't say sugar, because it uses corn syrup:

Raisin Cookies.
(Makes 50 to 60 cookies)

1/2 cup shortening
1 cup white corn syrup
1 egg
1/2 teaspoon cinnamon extract
1 teaspoon vanilla
2 1/2 cups flour
1/2 teaspoon salt
1/2 teaspoon baking soda
2 teaspoons baking powder
1 cup apple sauce
1/2 cup chopped nutmeats
1/2 cup chopped raisins

Cream shortening with corn syrup and egg. Add flavorings. Sift dry ingredients together and add to creamed mixture. Alternate dry ingredients with apple sauce. Fold in chopped raisins and nuts. Drop by spoonfuls on a greased baking sheet and bake in a moderate oven 15 to 18 minutes.

Who ever heard of carrots in cookies? Well, the surprise is a nice one, and the cookies are popping full of vitamins when you make:

Honey-Carrot Cookies.
(Makes 5 dozen)

2 cups sifted flour
1 teaspoon baking powder
1/4 teaspoon soda
1/2 teaspoon salt
1/2 teaspoon cinnamon
1/2 teaspoon nutmeg
2 cups quick-cooking oatmeal
1 cup raisins
1 cup chopped nutmeats
1/2 cup shortening
1 cup strained honey
2 eggs, well beaten
1 cup grated raw carrot

Sift dry ingredients together. Sift again. Add oatmeal, raisins and nutmeats. Mix well. Cream shortening, add honey, creaming thoroughly. Add eggs, then carrots, beating well. Stir in dry ingredients and blend thoroughly. Drop by spoonfuls on a greased baking sheet. Flatten with a floured fork. Bake for 15 minutes in a 350-degree oven. Store only when cold.

Whole grain, especially oatmeal, is rich in that important morale vitamin, B1, or thiamin, as it is sometimes called.

Oatmeal Refrigerator Rolls.

1/2 cup shortening
3 tablespoons sugar
1 1/4 teaspoons salt
1/2 cup boiling water
1 cup quick-cooking oatmeal
1 cake yeast
1/2 cup lukewarm water
1 egg, beaten
2 1/4 cups all-purpose flour

Add boiling water to sugar, salt, shortening and oatmeal. Stir well. Cool to lukewarm. Soften yeast in lukewarm water, then add with beaten egg to oatmeal mixture. Stir in half of flour, add rest of flour. Place in a greased bowl. Cover with waxed paper and store in refrigerator. When needed, remove from refrigerator and form into cloverleaves in greased muffin tins. Cover and let rise in a warm place until almost double. Bake 12 to 15 minutes in a 425-degree oven.

Seed Money

There's only one thing more foolish than killing the goose that lays the golden eggs. That's living up the money that has been put away to buy the seed for next year's crops.

Although G-E turbines and lamps and refrigerators don't grow from any seed you can buy at a seed store, yet any manufacturer — no matter what he makes — has a seed problem just the same. For next year's models, and improved designs, and new products—all these cost money. Money for research, and engineering, and new tools, and advertising to tell the public where a product can be obtained, and how much it will cost.

And the only place this money can come from is out of past earnings, or borrowing on the promise of earnings in the future. In other words—from seed money.

From the seed of research and engineering, planted in years past by General Electric, have come some pretty amazing crops. Incandescent lamps five times as efficient as Edison's, vacuum tubes that made radiobroadcasting possible, refrigerators for the home and electric machines for industry to make important jobs easier.

Right now the crops we're growing are all of the "Victory Garden" kind—weapons that are serving with our armed forces on land and sea and in the air.

But we mustn't neglect the seed money for the future. We're looking forward to the continuance of the industrial system that will allow us to open up and cultivate other new and promising fields. So, tomorrow, look for important developments in television, fluorescent lighting, plastics, electronics. These will be familiar words in the post-war world. GENERAL ELECTRIC COMPANY, SCHENECTADY, N. Y.

GENERAL ELECTRIC
